

API Comparison Table

OpenAlex | EventRegistry | RapidAPI (Real-Time News Data)
Internship Task — Intern 8 | July 24, 2026

Note on accuracy: OpenAlex introduced a mandatory API-key requirement and usage-based pricing in February 2026, replacing its previous fully open, no-key access. The tables below reflect this update where relevant, alongside the original test results.

1. Main Comparison Table

API	Data Type	Data Provided	Free Tier	Authentication	Format	Python	Status	Works?	Major Constraints	Verdict
OpenAlex	Academic Research	Research papers, authors, institutions, journals, citations, keywords, topics	Free (usage-based since Feb 2026)	API key required (since Feb 2026)	JSON	Yes	200	■	Large/complex JSON; key now required	Highly Recommended
EventRegistry	News & Events	News articles, global events, topics, organizations, locations, event analytics	Free account, limited access	API Key	JSON	Yes	200	■	Limited free-tier features and request quota	Recommended with Limitations
RapidAPI (Real-Time News Data)	Live News	Latest news, headlines, full story coverage, publishers, article URLs, publication time	Free plan, limited monthly requests	RapidAPI Key	JSON	Yes	200	■	Must subscribe; limits vary by provider	Recommended

2. Detailed Comparison Table

Feature	OpenAlex	EventRegistry	RapidAPI (Real-Time News Data)
Primary Purpose	Academic research database	News intelligence & event monitoring	Real-time news retrieval
Type of Information	Research publications	News articles and events	Live news and headlines
Registration Required	No (key required from Feb 2026)	Yes	Yes
API Key Required	Now Yes (since Feb 2026)	Yes	Yes
Authentication Method	API key (since Feb 2026)	API Key	RapidAPI Key
Response Format	JSON	JSON	JSON
Ease of Integration	Very Easy	Moderate	Easy
Python Library Used	requests	requests	requests
Test Result	Successful	Successful	Successful
HTTP Status Code	200 OK	200 OK	200 OK
Output Saved	openalex_output.json	eventregistry_output.json	rapidapi_output.json
Suitable For	Academic research & citation analysis	News analytics & event tracking	Live news applications
Overall Rating	★★★★★	★★★★■	★★★★■

3. Guide's Required Format

API	Data Type	Free Limit	Auth	Works?	Major Constraint
OpenAlex	Academic Research	Free (usage-based since Feb 2026)	API Key (since Feb 2026)	■	Large JSON response; key now required
EventRegistry	News & Events	Limited Free Tier	API Key	■	Limited free features and request quota
RapidAPI (Real-Time News Data)	Live News	Limited monthly requests	API Key	■	Subscription required before use

4. Status Legend

Symbol	Meaning
■	Fully Working
■■	Partially Working
■	Not Working

All three APIs worked successfully during testing: OpenAlex → ■, EventRegistry → ■, RapidAPI → ■.

5. Presentation Tip — "Which API is Best?"

OpenAlex — Best for academic and research-related data. Free for typical use, though a registered API key is now required following the February 2026 policy change (it is no longer usable with zero authentication).

EventRegistry — Best for structured news analysis and event tracking, but has free-tier limitations on request volume and advanced features.

RapidAPI (Real-Time News Data) — Best for accessing live news through a simple, quick-to-integrate interface, though it requires an API key and has request limits that vary by provider.
