

Day 7 – Advanced Google Dorking

Target: Canva Pty Ltd

Investigation Type: Passive OSINT

#	Google Dork	Purpose	Findings
1	site:canva.com filetype:pdf intitle:Canva -jobs -help	Locate public PDF documents	Design guides and documentation indexed.
2	site:canva.com inurl:docs OR inurl:documentation filetype:pdf	Documentation	Help guides and manuals.
3	cache:canva.com	Cached pages	Some cached pages available.
4	site:canva.com inurl:login OR inurl:signin intitle:login	Login portals	Official login pages only.
5	site:canva.com filetype:json OR filetype:xml intext:api	Configuration files	No sensitive configs observed.
6	site:canva.com intitle:"index of"	Directory listing	No open indexes found.
7	site:canva.com filetype:xlsx OR filetype:docx OR filetype:pptx	Office docs	Only public documents found.
8	site:canva.com cache:marketing	Cached marketing	Limited cached results.
9	site:canva.com filetype:pdf intitle:guide intext:design -help -blog	Official guides	Reduced search noise.
10	site:canva.com "Magic Studio" AROUND(5) AI	AI search	Magic Studio AI pages.

High-Confidence Findings

Public documentation, help resources and official login pages are indexed. No exposed configuration files or open directory listings were observed.

Inferred Findings

Canva follows good search-engine indexing practices and exposes only intended public resources.

What Was Deliberately Not Pursued

No login attempts, brute-force attacks, vulnerability scanning, exploitation or interaction with protected resources.

Search-Engine Exposure Assessment

Canva has a well-managed public footprint. Indexed content is primarily documentation, educational resources, and product pages, indicating strong search-engine hygiene.
